

Brochure | SEEBURGER Integration Services for SAP

## EDI Integration for **SAP GTS** Customs Communication

# SAP and SEEBURGER: A Trusted Partnership for Electronic Customs Communication

## SEEBURGER: The EDI Expert powering SAP Global Trade Services

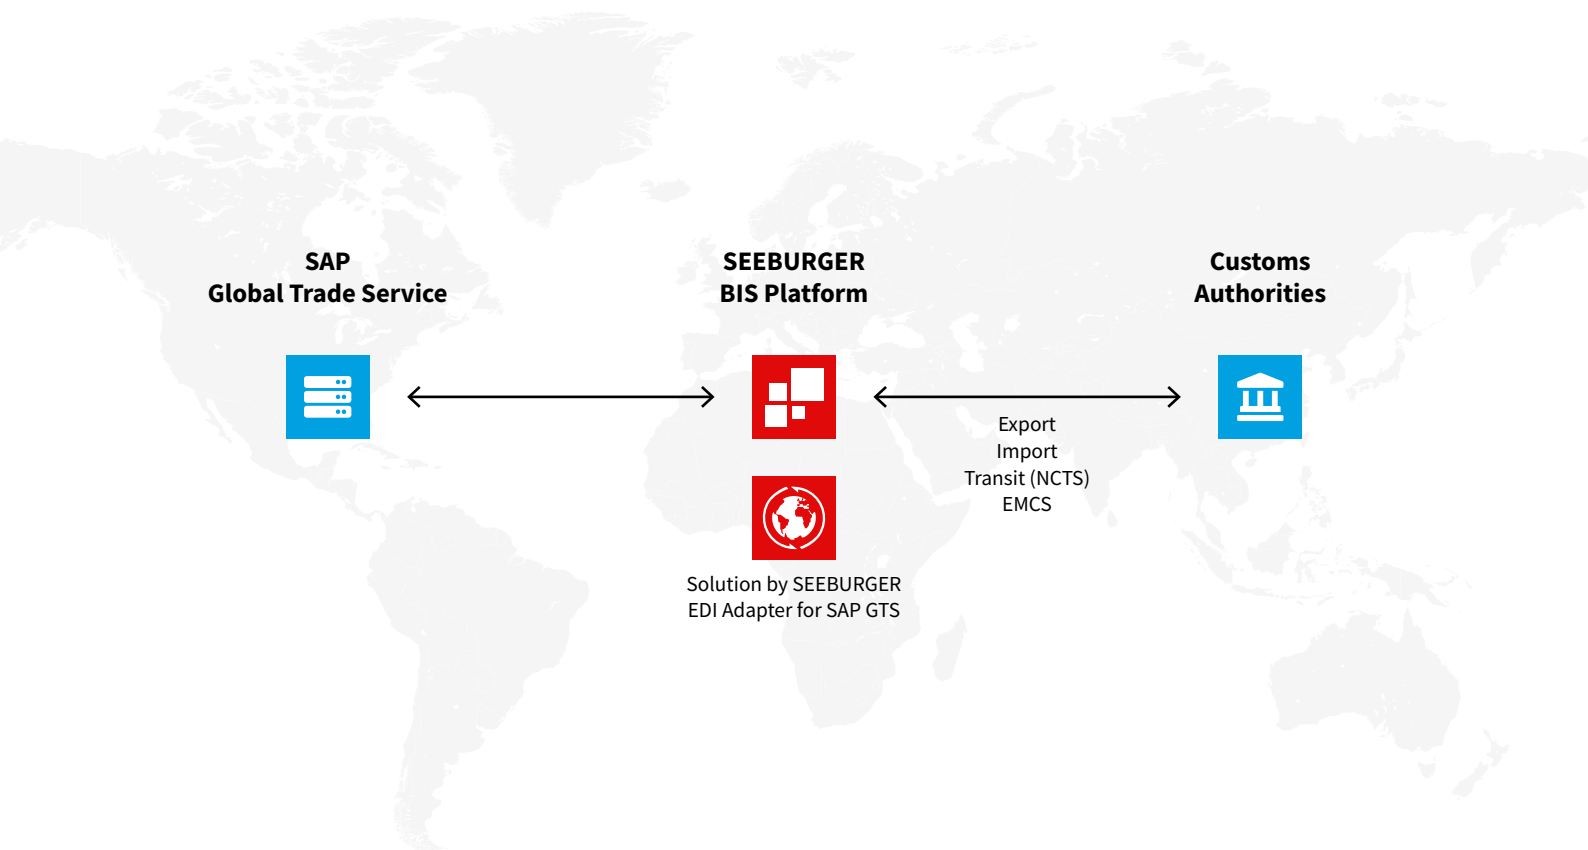

Companies that ship internationally must comply with national and international regulatory requirements to satisfy customs authorities in the destination countries. SAP Global Trade Services (SAP GTS) is the solution many SAP customers use to handle the electronic communications involved. It streamlines trade management, ensures compliance with global trade regulations and expedites customs procedures.

Our longstanding partnership with SAP has enabled SEEBURGER to develop a Center of Excellence to support SAP GTS through our market-leading SEEBURGER BIS Platform. This integration software guarantees that all communication to national and international customs authorities complies with legal requirements and, at the same time, ensures the seamless operation of all electronic communications through the SAP GTS system. We know that customs processes differ from country to country and that there are numerous communication standards and protocols used for B2B, including email, web services, FTAM, FTP, OFTP2, MQ and Value Added Networks (VAN). We comply with all the necessary standards and protocols, while our future-proofing practices ensure we are ready for new standards as they emerge.

## SAP-Approved Integration Services for SAP Global Trade Services (GTS)

Since its launch in 2004, the EDI Service for SAP GTS has been continuously developed to connect new countries and meet the ever-changing requirements from authorities and customers. As an official SAP partner, SEEBURGER works closely with the SAP GTS team to develop and implement message conversions and connections to supported customs authorities and many intermediate brokers.

Furthermore, SEEBURGER actively supports SAP in meeting the various legal customs requirements, assisting with the certification processes. The EDI Service for SAP GTS is based on the highly successful B2B integration software, the SEEBURGER BIS Platform. Available as fully-managed cloud-based integration services, an iPaaS or an on-premises installation, the BIS Platform is the only hybrid integration platform in the world that is enabled for SAP Global Trade Services.

# SEEBURGER EDI Service for SAP GTS: Seamless Integration for Customs Compliance

## The SEEBURGER EDI Service for SAP GTS

**Robust:** SEEBURGER provides the most industry-proven technology on the market, offering a simple and effective solution for streamlining communication with customs.

**100% compliant:** SEEBURGER and SAP work closely with customs organizations to ensure that EDI Service for SAP GTS meets all requirements in the countries covered.

**Integrated:** SEEBURGER provides the expertise and technology to connect your business-critical SAP GTS processes with speed and reliability. Our integration service for SAP GTS is no patchwork – it's built on a single software stack and delivered from a single source, ensuring seamless, dependable integration for all your customs and compliance needs.

## At a Glance – Why SEEBURGER?

### Unlock the Advantages of the SEEBURGER EDI Service for SAP GTS

- + Instant EDI Connectivity: Seamless integration with 13 countries right out of the box – no custom development required.
- + Prepackaged GTS Workflows: Over 500 up-to-date mappings for standard customs processes.
- + Customs Broker Integration: Standard interfaces with the flexibility for tailored development.
- + Cloud-Based Advantage: Reliable, scalable and secure with a fast return on investment (ROI).

## SEEBURGER EDI Cloud Service for SAP GTS

SAP GTS customers benefit from a specialized version of the SEEBURGER BIS Platform, complete with over 500 mappings and prepackaged workflows. The SEEBURGER EDI Service for SAP GTS enables seamless self-filing for import, export, transit, and EMCS processes with customs authorities in 13 countries – delivered as a standard solution without additional development projects

### Customs Broker integration

The SEEBURGER BIS Platform seamlessly integrates with the SAP GTS broker interface, connecting your business to third-party customs brokers like DHL, Geodis, and DB Schenker for efficient declaration services. Our standard solution supports broker-centric, importer-centric, and exporter-centric communication scenarios, ensuring flexibility and efficiency for all your customs needs.

### Customs Processes Tailored to your Needs

For customs processes not covered by our standard EDI Service for SAP GTS, SEEBURGER works closely with you to develop a customized solution that fits your specific requirements.
