# Efficiency Through Design: SEEBURGER and SAP Fiori

## Customer-centered user experience with the SEEBURGER apps for SAP Fiori

The shortage of skilled workers in the IT sector shows no signs of abating. Well-trained specialists are in short supply and hotly contested. Non-specialist employees from various departments must be able to operate highly specialized systems with little to no training. However, the user interfaces of such systems are often complex and not user-centered. At the same time, driven by the appealing intuitive design of consumer apps, the demands on the design of user interfaces in the business sector are increasing.

With Fiori, SAP fundamentally changed the way users interact with its software in 2013. SAP Fiori is the foundation of the user interface for SAP 4/HANA and an essential part of SAP's UI strategy. SEEBURGER has integrated SAP Fiori into its Solution Extensions for SAP to provide a modern, customer-centric user experience.

#### Simple and intuitive design

At the heart of SAP Fiori is its simple and user-friendly design, based on scientific findings on intuitive information processing. This not only makes it easier to employ for line of business (LoB) users, but increases efficiency at the same time. SEEBURGER has adopted these principles and integrated them into its Solution Extensions for SAP to provide a seamless user experience.

The SEEBURGER Fiori apps are based on the principle of role and task orientation. They focus on the essential functions that are needed for processing a specific use case, avoiding unnecessary complexity. For example, users can easily approve invoices without being overwhelmed by superfluous functions or information. Thanks to a design structure familiar from smartphones and tablets, Fiori apps provide an intuitive and pleasant user experience.

# Customized user experience for a wide range of users

The SAP Fiori-based SEEBURGER Solution Extensions for SAP are tailored for a wide range of potential users, especially those who only work with SAP systems occasionally. The implementation of Fiori in the SEEBURGER Solution Extensions is more than a mere adaptation of the user interface. It represents a paradigm shift in the way users interact with our business software. The Solution Extensions for SAP offer a wide range of functions for a wide variety of use cases – from monitoring business processes to specific tasks such as document releases and status queries. Thanks to the customizability of specific roles and tasks, such as order management or supplier evaluation, the Fiori Launchpad gives users direct access to exactly the tools and information they need. The goal is to make the user experience as intuitive as possible in order to achieve increased accessibility and efficiency for all users.

### Mobile accessibility for a flexible working environment

Home office, workstations, mobile workplaces – modern companies need flexibility. Company applications must be displayed and function cleanly and smoothly on a wide variety of end devices. The Fiori apps integrated into the SEEBURGER Solution Extensions for SAP adapt responsively to different screen sizes and device types, be it on a desktop, tablet or smartphone. With this flexibility, users can complete their tasks anytime and anywhere – an advantage not least for mobile teams and field staff.

#### **Lower costs**

- + Intuitive application
- + Decreasing error rates
- + Remote/mobile working
- + Reduced training effort

#### Fit for the future

- + Flexible and future-proof
- + Basis for the development of innovative solutions
- + Adapted to market developments
- + Reduced training costs
- + Long-term partnerships

#### Increase in productivity

#### **Broad target group**

- + Optimal for SAP-inexperienced LoB users
- + Reduction of complexity
- + Role- and task-oriented
- + Pleasant user experience

#### **Optimization of business processes**

- + Editing directly from the Fiori MyInbox, without leaving the Launchpad
- + Automation of time-consuming and errorprone manual processes
- + Accelerated process flows
- + Data analysis and reporting via the SEEBURGER KPI Dashboard

#### Security and compliance

- + Highest security standards
- + Seamless integration into existing company systems
- + Always up to date with the latest legislation

### 8

### Security and compliance

The Fiori apps are designed in such a way that they meet the highest security standards and allow seamless integration into existing company systems. Security and compliance also enjoy the highest priority during the integration into the SEEBURGER Solution Extensions for SAP.

That way SEEBURGER customers benefit not only from an improved user experience, but can also be certain that their data and processes are protected at all times.

### Optimization of business processes

Business processes are one use case in which the SEEBURGER SAP Fiori apps can make a notable difference. They allow for the automation of time-consuming and error-prone work processes – for a significant increase in overall efficiency.

For example, the Fiori-based Invoice Release App enables the seamless processing of documents as well as the quick and uncomplicated release of invoices directly from the Fiori MyInbox without users having to leave the Fiori Launchpad – for faster and cleaner process flows.

### Data analysis and Reporting

The SEEBURGER KPI Dashboard offers users valuable insights into key figures and metrics that are essential for informed business decisions.

By providing access to this valuable business data, the SAP Fiori apps in the SEEBURGER Solution Extensions allow users to benefit from dynamic, easy-to-understand data analysis and reporting.

This also helps to reduce error rates.

#### SEEBURGER and SAP Fiori – the long-term vision

The modern business world is fast-moving and volatile. Business software must be able to grow with these requirements. The integration of SAP Fiori into the SEEBURGER Solution Extensions for SAP creates a flexible and future-proof basis for the development of innovative solutions that can be adapted to the latest technological developments and the needs of SEEBURGER customers. SEEBURGER works closely with its customers, to understand their specific requirements and always optimally tailor the SEEBURGER Fiori apps to the needs of users and the current market demands. In this way, SEEBURGER supports the digital transformation of its customers both in terms of technology and in terms of how companies work and create value.

### Advanced technologies for long-term partnerships

As an integral part of the SEEBURGER Solution Extensions for SAP, Fiori will enable the development of powerful, user-friendly and intelligent solutions in the long term. Future technologies such as artificial intelligence, machine learning and advanced analysis functions allow deep insights into business processes and help to increase efficiency and competitiveness. SEEBURGER's expert teams provide our customers with long-term support and consulting that goes far beyond the implementation of SAP Fiori. We are always available to ensure that SEEBURGER customers can realize the full potential of their SAP Fiori-based solutions.
