

SEEBURGER E-Invoicing Solution

## OASE uses SEEBURGER for B2Tax VAT Reporting

As of 1<sup>st</sup> of July 2018, real-time VAT reporting to the tax authorities NAV became mandatory in Hungary. This date was a very important and time-critical goal for OASE GmbH and its Hungarian subsidiary. A suitable e-invoicing solution should also avoid fines of up to the equivalent of around €1,600 per invoice for late notifications.

OASE already had a modern SAP® ERP landscape and connection to SEEBURGER B2B/EDI Managed Services. SEEBURGER was chosen because of the quickly available E-Invoicing Cloud Services as well as high competence in creating the required XML files and real-time delivery of the reporting data to NAV.

“ *The electronic connection of OASE to NAV was implemented on schedule in just 6 a few weeks with minimal setup effort. The functionality, security and efficiency of the global SEEBURGER E-Invoicing Solutions in the Cloud and the competence in SAP convinced us. After Hungary, B2B e-invoicing in Italy with the SEEBURGER Cloud is now on the agenda.* ”

*Mr. Vossen, Head of IT, OASE GmbH*
