Payments Trends

**The Struggle is Real:  
Payments Today**

# A Typical Painful Payments Day

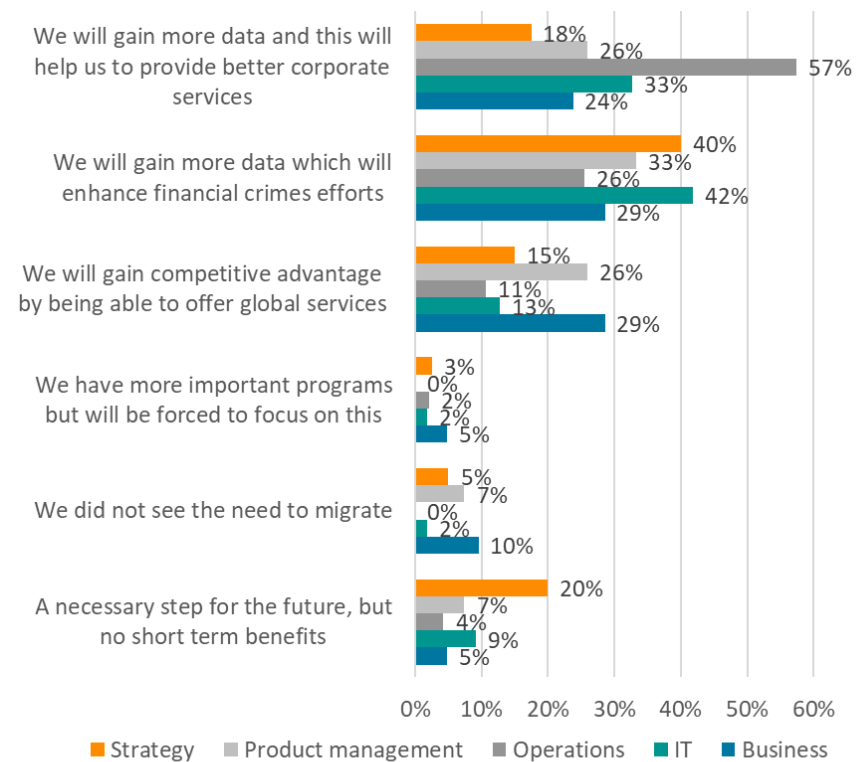

# ISO 20022 – The Payments Language of the Future

- ISO 20022 is rapidly becoming the financial messaging standard, with faster payments initiatives in many countries and in many payment rails
- Adoption of ISO 20022 will improve interoperability across payment systems and other related applications, and make it easier to connect and collaborate across banks and corporates globally
- SWIFT will enforce usage for banks by November 2025.

"Anybody and everybody who touches a payment across the whole entire value chain – your treasury system, treasury management, suppliers within the corporates and the ERP systems – they're all going to need to be able to handle 20022, create it and migrate it."

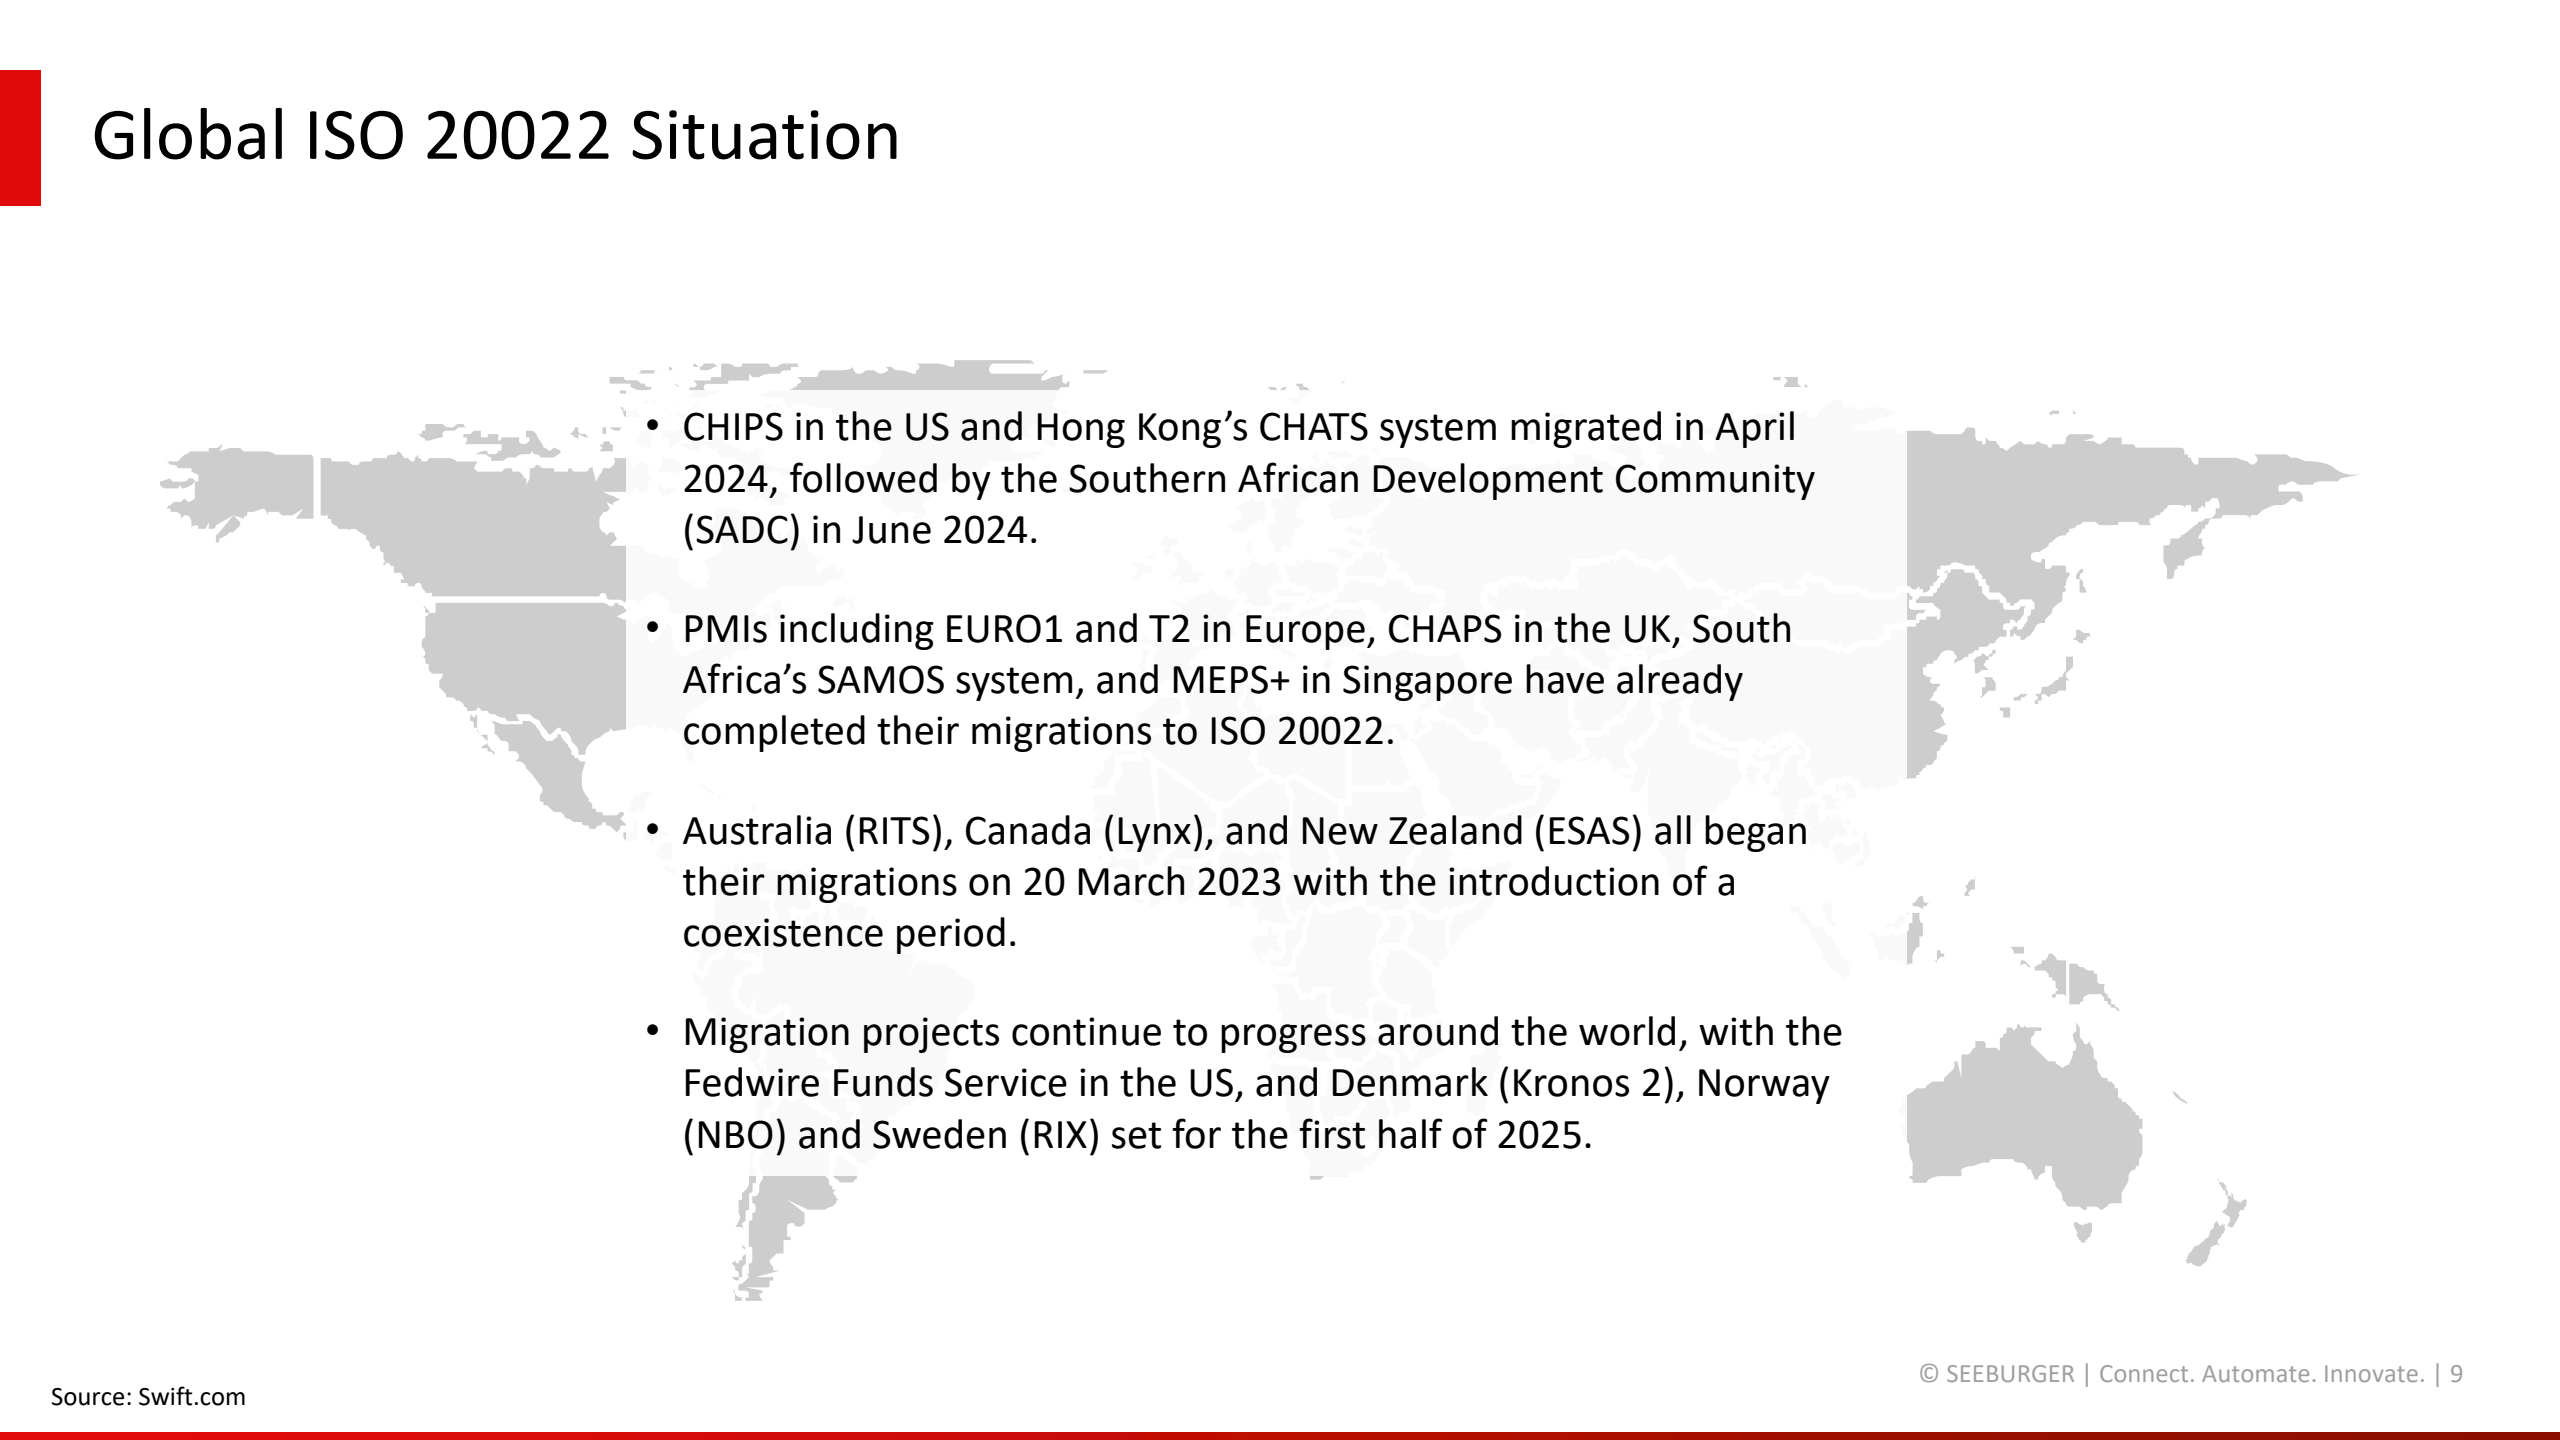

Gareth Lodge, Principal Analyst of Global Payments, Celent

Question: (Banks) How do you view the move to ISO 20022? (Top four answers)  
Source: Celent Global ISO 20022 Readiness Survey, 2022

# Global ISO 20022 Situation

- 
- CHIPS in the US and Hong Kong's CHATS system migrated in April 2024, followed by the Southern African Development Community (SADC) in June 2024.
  - PMIs including EURO1 and T2 in Europe, CHAPS in the UK, South Africa's SAMOS system, and MEPS+ in Singapore have already completed their migrations to ISO 20022.
  - Australia (RITS), Canada (Lynx), and New Zealand (ESAS) all began their migrations on 20 March 2023 with the introduction of a coexistence period.
  - Migration projects continue to progress around the world, with the Fedwire Funds Service in the US, and Denmark (Kronos 2), Norway (NBO) and Sweden (RIX) set for the first half of 2025.

# Bank to Corporates: Payments Paint Points

## GLOBAL RESPONSE

### What are the biggest pain points you hear about from your customers?

### Regional ranking of customer pain points

	North America	Europe	Southern Europe	Benelux	UK	Nordics
Efficiency, speed of cross border payments	1	2	1	1	3	7
The cost of payment processing	2	4	4	4	6	2
Access to real-time or intraday liquidity management	3	1	2	2	5	3
Integration with bank systems via API	4	5	3	5	2	4
Speed of access to new payment services	5	6	6	6	4	6
ISO 20022 messaging transformation to synchronise messaging formats	7	3	5	3	1	1
Lack of extended/rich data and end-to-end visibility around payables or receivables	6	7	7	7	7	5

# How ISO 20022 Enables and Supports Global Payment Trends

What	How
Digital Payments	ISO 20022 provides a standardized framework for digital payments, ensuring seamless communication and interoperability between different systems. It supports various payment types, including instant payments, request to pay, and direct debits.
Cross-Border Payments	ISO 20022 plays a crucial role in enabling faster and more transparent cross-border payments. It provides a common language for financial institutions, reducing friction and improving settlement times.
Open Banking	ISO 20022 supports open banking by providing a standardized format for data exchange, ensuring compatibility between different financial institutions and fintech companies.
Real-Time Payments	ISO 20022 is essential for real-time payments, providing the necessary messaging infrastructure to facilitate immediate transactions.

The background features a dark red color with several large, overlapping chevron shapes pointing to the right. Some of these shapes are filled with a lighter shade of red, while others are outlined in a thin, light-colored line. A vertical white line is positioned on the left side of the slide, partially overlapping the dark red text box.

ISO 20022: What  
Does It Mean For You

# As a Bank ... How Can ISO 20022 Help You?

- Increased Efficiency
- Improved Data Quality
- Enhanced Fraud Detection
- Streamlined Regulatory Compliance
- New Revenue Opportunities
- Competitive Advantage
- Global Interoperability

# As a Corporate ... How Can ISO 20022 Help You?

- Improved Reconciliation
- Working Capital Improvements
- Enhanced Fraud Detection
- Streamlined Cross-Border Payments
- API Connectivity
- Regulatory Compliance

# For Banks it's Mandatory, for Corporates it's Just Smart

- It will help improve operational efficiencies
- It's a win-win for both banks and corporates
- It will help with payment reconciliation – a common pain point for many!

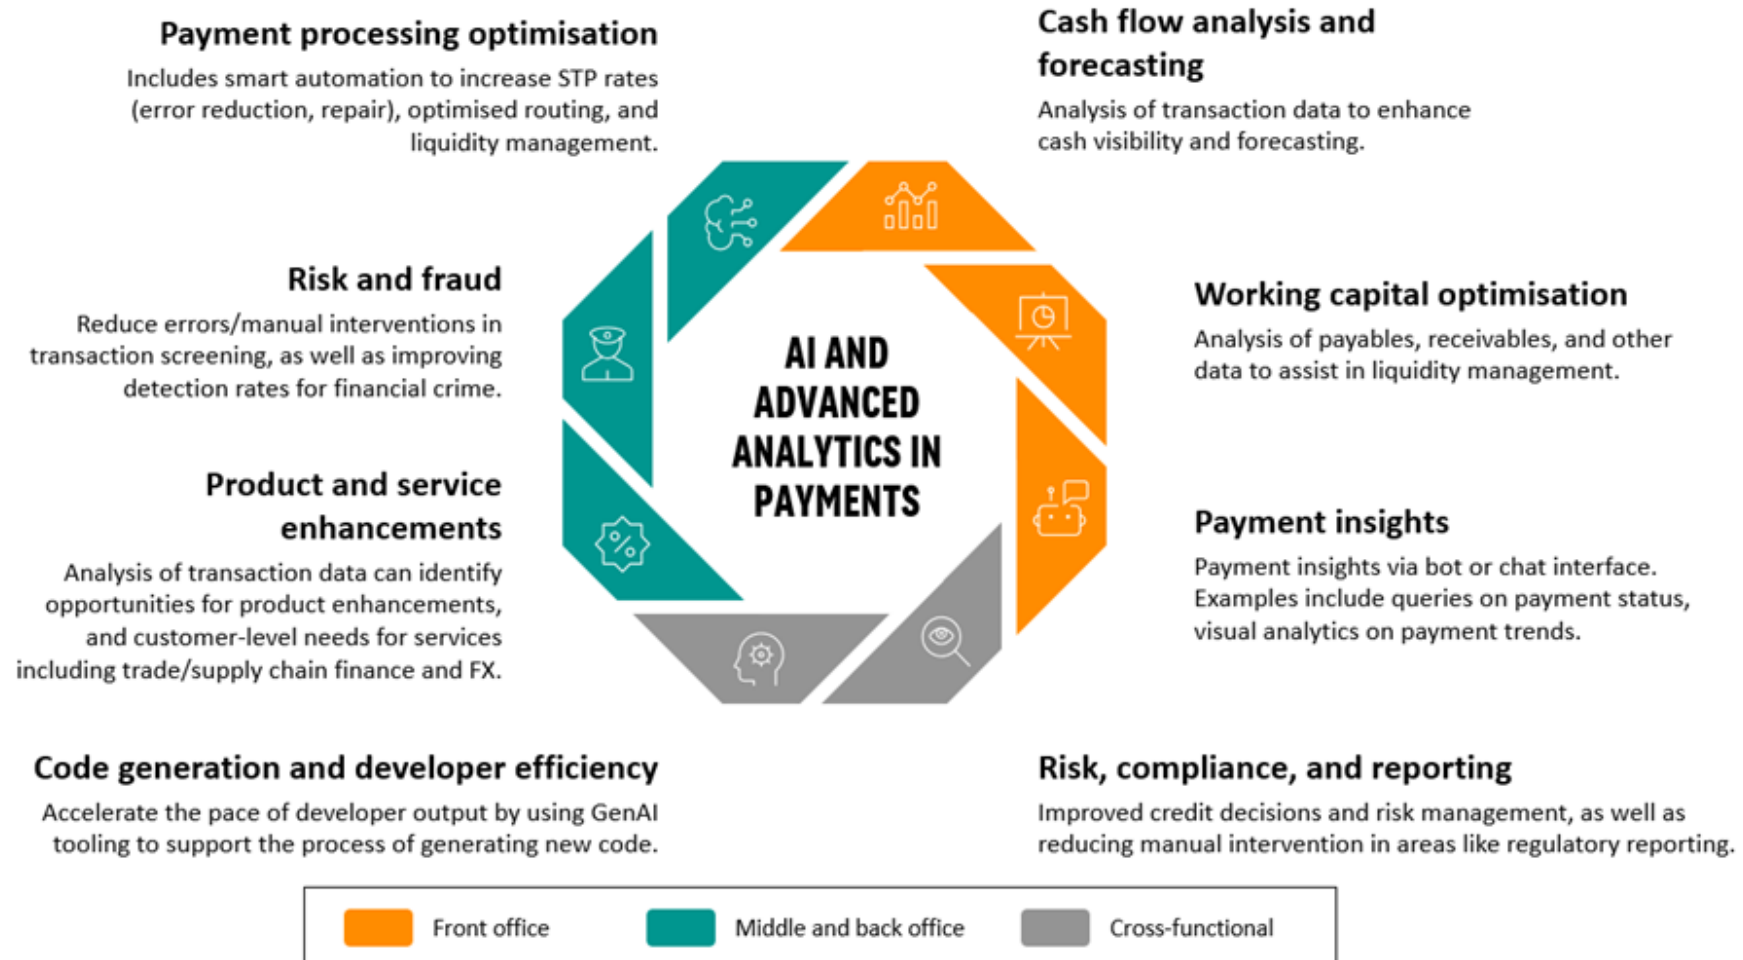

Not mandatory for corporates, but if you jump on the ISO 2022 bandwagon now, you can:

- Improve/automate your reconciliations
- Leverage data and improve your reporting capabilities
- Enable AI when ready

Act now! The financial community has been ready to receive ISO 2022 traffic since March 2023.

Final Words

# What Do You Need to Do Now?

Banks need to be ready!

Without the banks, corporates can't benefit from ISO 20022 (and vice versa!).

Alignment is key!

- Within the bank
- Towards your corporate customers and business partners

Start identifying and addressing the gaps:

- Identify business-critical use cases
- Predict system and application impact
- Coordinate with relevant stakeholders
- Test, test, test!
- Equip your teams with knowledge (=training!)

# Time for Your Questions

# How SEEBURGER Can Help

A global team in place to support you with a best practice approach to smarter payments, the ongoing transition to ISO 20022, process automation, and much more for both banks and corporates using the SEEBURGER Payments Integration Hub.

## **Process Automation:**

Integrated onboarding, self-services, testing and migration

## **Risk Mitigation:**

Automated payment reconciliation, compliance rule-sets, fraud detection, AVP and DLP integration

## **Power up data transformation:**

Powerful and comprehensive transformation supporting any format of standards such as ISO 20022, SWIFT MT/MX, ANSI X.12, EDIFACT, ACH, NACHA, BAI, BACS and more

## **Move to the cloud:**

Any cloud, hyperscalers and all operating models

## **Real-time overview:**

Real-time monitoring of payment processes for your end users, business or technical

## **Application Integration:**

Integration with ERPs, CRMs, Treasury Management Systems (TMS), human relations payroll systems and more
